REUTERS NEWS SERVICE

The words still echo in many ears, but science is

as it turns out, sitting upright in a 90-degree position places more strain on the back than sitting slightly reclined in a 135-degree position.

22 healthy adults with no history of back pain or back surgery sat in three different

So far desk-bound workers who want to protect their backs, it is advised that they find a chair with the ability to recline at 135-degrees.

This may be all that is necessary to prevent chronic back pain, for employee

### DIMENSIONS

### FUNCTIONS
